Phone On-Hold Marketing is a division  
of Sonkei Communications

# WHAT MAKES US DIFFERENT?

Over the years, we have identified certain attributes that our clients appreciate when working with a message on-hold service company. We have organized these criteria into our service programs, which we believe makes our company unique.

Phone On-Hold® Marketing Systems, Inc. created three service plans to serve our clientele. They were simply designed to meet the needs of the different types of call volumes and marketing standards of our clients. These service plans are the Classic, the Premier and the ULTRA, and each allows a business to have a choice of the number of production changes they can make over the course of 12 months. And...there's more!

#### Remote Load Delivery

- No more tapes, CDs, smart cards, or chips
- No on-site tape management
- Update all of your locations within 48-72 hours

#### It All Works Fast & Easy

- We order the equipment and certified installer
- Script information form to start the writing process
- Our copywriters create your script for approval
- Upon approval, we go into production
- Change your mind – we'll fix it!

#### Web-Based Management

- Approve your production before we upload (deliver) it
- Audition talent/music on our website
- Utilize our new Script Management Software

As a client of Phone On-Hold® Marketing Systems, Inc., you have a password-protected area on our website. Our website is also a place for you to listen to our on-staff talent and our music library.

Phone On-Hold® Marketing Systems, Inc. is always looking for new ways to make your experience with us like no other. Let us know if you have any ideas – we would love to hear them.
